Subject: Letter of Appreciation for Ekosis d.o.o.

Dear Sir or Madam,

We would like to express our appreciation for Ekosis d.o.o. for its professional, reliable, and dedicated cooperation during the installation of the **Wellan2000 Biosignal Ring** in the Podmežakla Sports Hall in Jesenice, which was carried out in the autumn of 2024.

Particularly noteworthy is the company's high level of responsiveness. Throughout the entire process, the team maintained regular contact with us, monitored the operation of the system, and actively verified the effectiveness of the installed solution. Such an approach demonstrates a strong sense of responsibility toward the client and a commitment to achieving long-term results.

Most importantly, the solution has delivered measurable results. The **National Laboratory for Health, Environment and Food of the Republic of Slovenia**, which annually tests the water system of the Podmežakla Sports Hall for the presence of Legionella, reported in September 2025—one year after the installation of the ring—that no elevated Legionella levels were detected for the first time. For us, this result confirms the effectiveness of the installed system and makes an important contribution to ensuring a safe environment for the users of the facility.

Based on this experience, we can confidently recommend Ekosis d.o.o. as a reliable partner that provides high-quality solutions and professional support even after project completion.

Yours sincerely,

SPORTS INSTITUTE JESENICE
